

Array BioPharma policy does not currently provide for an expanded access program for our products. However, requests by physicians for individual patient access are evaluated on a case-by-case basis based on criteria that includes data supporting use in that disease state, the potential impact on clinical development, the availability of treatment options other than compassionate use access to investigational agents, and compliance with FDA requirements. There is no guaranty that such individual patient access will be provided. For further inquiries, please contact [arraybiopharma@druginfo.com](mailto:arraybiopharma@druginfo.com) or call 1-844-792-7729. A response to your inquiry will be provided within five (5) business days.
